PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience building full-stack web applications and exploring AI-powered tools using Python and the MERN stack. Comfortable working with REST APIs, cloud-based services, and backend systems, with a growing interest in AI/ML and Generative AI application development. Quick learner who enjoys solving real engineering problems, collaborating with teams, and picking up new technologies fast. Looking to contribute as a Software Engineer Intern (AI Engineer) and build scalable, intelligent platform tools.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, C, SQL
AI/ML & GenAI:	LLM APIs, Prompt Engineering, AI-Assisted Development, basics of Machine Learning & RAG concepts
Backend:	Node.js, Express.js, RESTful API Design, CRUD Operations, API Integration
Frontend:	React.js, HTML5, CSS3, Bootstrap, Responsive Design
Databases:	MongoDB, MySQL, SQL, Oracle
Cloud & DevOps:	Git, GitHub, GitHub Actions (CI/CD), basics of cloud deployment.
CS Fundamentals:	Data Structures, Algorithms, OOP, Complexity Analysis, Problem Solving
Practices:	Agile/Scrum, Debugging, Cross-functional Collaboration

EXPERIENCE

Full Stack Development Intern — Technical Hub	2024
- Built real applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js) in a hands-on internship. - Developed responsive React UIs connected to REST APIs built with Express.js and Node.js, covering CRUD operations and authentication. - Worked with MongoDB for schema design and data storage, and used Git/GitHub for version control in an Agile workflow. - Gained practical exposure to API integration and deployment basics, completing the full app-building lifecycle end to end.	

PROJECTS

Educare — AI Career Guidance Platform GitHub	Jan 2025 – Mar 2025
React.js, Node.js, Express.js, MongoDB, LLM APIs, REST APIs, Git	
- Built a full-stack web app giving students personalized career guidance through an AI-powered recommendation engine using an LLM API. - Designed 12+ REST API endpoints with full CRUD support for student profiles, resources, and recommendations. - Structured a MongoDB database with 4 collections and optimized queries, improving response time as data scaled. - Shipped features iteratively using Git branches and GitHub Actions, following an Agile workflow.	

Virtual Lab Simulator — Browser-Based Learning Platform GitHub	2024 – 2025
HTML5, CSS3, JavaScript, AI-Assisted Development (GitHub Copilot, ChatGPT), GitHub	
- Built a browser-based simulator with 15+ interactive experiments across Physics, Chemistry, and Computer Science. - Added secure signup/login flows with input validation and controlled access. - Used AI tools like GitHub Copilot and ChatGPT to speed up prototyping, testing, and debugging.	

EDUCATION

B.Tech in Computer Science Engineering	2025 – 2028
Pragati Engineering College, Surampalem 86%	
Diploma in Communication & Computer Networking	Aug 2022 – May 2025
Aditya College of Engineering and Technology 93%	

CERTIFICATIONS

Full Stack Development Internship — Technical Hub • Java Programming Internship — Codsoft
Java 11 Essentials — Infosys Springboard • Microsoft AI Skills Passport — Microsoft
